SimpleMDG
MASTER DATA GOVERNANCE

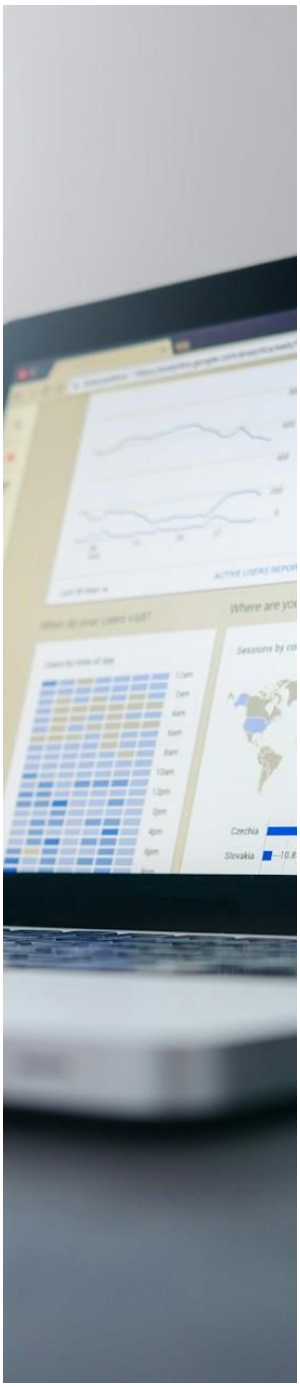
PM | ELEVEN

What is SimpleMDG?

SimpleMDG, a comprehensive Master Data Governance cloud solution for SAP® built entirely in SAP's Business Technology Platform (BTP). SimpleMDG helps enterprises fortify their master data foundation to enhance business operational excellence, ensure compliance and empower innovation. Easy. Powerful. Comprehensive.

SAP Spotlight App

SAP® Certified
Built on SAP Business Technology Platform



Enhance Operational efficiency through insightful data-driven maintenance with PM ELEVEN.

Why use SimpleMDG?

Comprehensive Data Management

Integrate and standardise data from various sources, maintaining high data quality and harmonisation. Minimise discrepancies and mistakes by standardising data quality rules and validations.

Robust Governance Framework

Develop clear policies and appoint data stewards which ensure compliance with industry regulations. Allocate resources more efficiently by automating data governance processes.

Workflow Automation

Streamline approval processes, manage data changes, and maintain audit trails. Streamline data management tasks with automated workflows and approval processes.

User-Friendly Interface

Offers intuitive dashboards, self-service tools, and real-time reporting.

Seamless SAP Integration

Built in SAP's BTP, leverage native SAP capabilities for smooth implementation and scalability as your business grows and data volumes increase.

Cost Savings

Decrease costs associated with correcting data errors and automating data governance processes. Minimise the risk of hefty compliance penalties and fines by ensuring regulatory compliance.

How Does SimpleMDG Work?

Data governance involves different users and roles in an organisation. SimpleMDG's customisable user interface enables users to view and edit fields that are relevant to them allowing for rapid creation and ongoing maintenance of master data objects. This contributes to higher user satisfaction and improved execution.

- Easy creation and maintenance of over 80 SAP master data objects
- Customisable workflows addressing all stakeholder needs
- Deliver real-time notification of changes
- Comprehensive audit trail, rules, and templates
- Key features like search, mass change, and reference copy functions.

Benefits of SimpleMDG

Improved Data Accuracy
Reduce errors and enhance decision-making.

Operational Efficiency
Automate processes and focus on strategic initiatives.

Enhanced Compliance
Protect sensitive data and meet regulatory requirements.

Better Insights
Gain reliable business insights for effective planning.
